IN THE ABSTRACT

Please amend the Abstract as indicated below and replace the current Abstract with the clean un-marked Substitute Abstract attached hereto.

A method [for] of forming an insulating ceramic [a] film or a metallic film by a plasma CVD process in which a high density plasma is generated in the presence of a magnetic field wherein ~~is described, characterized by that the electric power for generating the plasma has a pulsed waveform. The electric power typically is supplied by microwave, and the pulsed wave may be a complex wave having a two-step peak, or may be a complex wave obtained by complexing a pulsed wave with a stationary continuous wave. of an electromagnetic wave having the same or different wavelength as that of the pulsed wave. The process enables deposition of a uniform film having an excellent adhesion to the substrate, at a reduced power consumption.~~
